This chart is still incomplete but is a significant update from the last one I published in 1997. It was too large to create as a PDF file when it was laid out properly so I'm afraid I had to save in this 'darkened' waterfall style .

It is the result of a lot of hard work but you are welcome to download or print it for your own use. I would rather though that you didn't publish it on any other website.

If you can offer updates or corrections please contact me at:
